Partners In Building

PARTNERS IN BUILDING has designed and built literally thousands of one-of-a-kind homes since the company was founded in 1986. It's taught us how to do one thing really well – build the home you want. We understand that building a custom home isn't about cost per square foot. It's about thought per square foot, and there is simply no other builder who can design your custom home, provide a fixed price before the home starts and begin construction as efficiently as we do.

That kind of custom home experience is invaluable to our customers. It's how we ensure you get the best of both worlds – the personal attention you need from a local team of sales counselors, builders, and interior designers and the firm financial foundation and buying power of the #1 Custom Builder in Texas.
